

# Welcome to Sauce Shed

your product development partner

## On Boarding

*Approx Lead Time: 45mins*

Once we know how we can work with you, we send you a Mutual NDA document, additional paperwork and information needed to start working. This will also include and your on boarding invoice.

## Ingredients

*Approx Lead Time: 1-2 days*

After signing the NDA and processing your payment we need your recipes or outline for developing your products. Once we have that we will begin testing and creating the products.

## Sampling

*Approx Lead Time: 2-3 weeks*

If we believe we have it right we will send you a sample jar for you to look at taste, texture, colour etc. We will have a stable pH test and be able to advise on product shelf life and if it needs to go for lab testing. You'll be able to submit your honest feedback quickly and simply online.

## Re-Sampling

*Approx Lead Time: 2-3 weeks*

From your feedback we take the next step to either re-sample the products with the adjustments you've asked for or we move things to the next stage.

## Next Steps

*additional support and services*

Now you have your range ready our services don't stop, we offer the following:

- Branding Development
- Web Development
- Product Photography
- Social Media Support
- Social Influencer Reach
- Online Catalogue Assistance
- Retail Introductions
- and much more

## Delivery

*Approx Lead Time: 1 week*

Once your products have been produced, bottled or jarred and labelled we will box your order and prepare for delivery or collection.

If we are holding your stock for fulfilment, distribution and product management we will move it to our store and wait for your first order.

## Push the Button

*Approx Lead Time: 2-4 weeks*

Once we know how many units you'd like we schedule your production, make sure your labels and in print and have your ingredients and packaging on route. Then it's time to cook your products.

## Pre-Production

*Approx Lead Time: 1 week*

Here we look at the product costs per unit and supply you with a price matrix. We calculate the nutritional information, assign barcodes and internal SKU codes and get ready for your first batch run creating your product HACCP plan.
